

## EXPLANATORY NOTE

Estimates in this release are based on the Current Employment Statistics (CES) survey conducted quarterly by the Guam Department of Labor's Bureau of Labor Statistics in cooperation with the U.S. Department of Labor's Employment and Training Administration.

### Employment Concepts

Employment data, except those for the Federal Government, refer to persons on establishment payrolls who received pay for any part of the pay period, which includes the 12<sup>th</sup> of the month. For Federal Government establishments, employment figures represent the number of persons who occupied positions on the last day of the calendar month. Intermittent workers are counted if they performed any service during the month.

The data excludes proprietors, the self-employed, unpaid volunteer or family workers. And domestic workers in households. Salaried officers of corporations are included. Government employment covers only civilian employees; military personnel are excluded.

Persons on establishment payrolls who are on sick leave (when pay is received directly from the firm), on paid holiday or paid vacation, or who work during a part of the pay period and are unemployed or on strike during the rest of the period, are counted as employed. The CES survey counts a person employed by two or more establishments at each place of employment. Not counted as employed are persons who are laid off, on leave without pay, or on strike for the entire period or who are hired but have not been paid during the period.

### Industrial Classification

Establishments reporting on Form BLS-CES 3 are classified into industries on the basis of their principal product or activity determined from information on annual sales volume. This information is collected on a supplement to the quarterly shuttle questionnaire. For an establishment making more than one product or engaged in more than one activity, the entire employment is included under the industry indicated by the most important product or activity. Employment series are classified in accordance with the Standard Industrial Classification Manual, U.S. Office of Management and Budget. The 1972 Classification was used for the CES until March 1989 when a change to the 1987 edition was made.

### Acknowledgements

Acknowledgement is due the University of Guam Computer Center under the direction of Dr. Luan Nguyen and particularly Ms. Frances Villaverde for data processing and programming work. Acknowledgement is also due Marie Heflin of the Department of Labor for conducting the survey.

## Employment Highlights

The June 2015 preliminary statistics show the total number of private sector jobs have increased by 670 in the latest quarter and by 1,270, or 2.7 percent, from the comparable period of one year ago. By sector, employment gains were realized in the latest year in tourism related industries including transportation and hotels, as well as in the other services category which includes medical services.

Construction employment was up by 320 jobs this quarter but down 620 over the year. Hotel employment increased by 280 jobs this quarter and 670 jobs for the year. All other services were up 130 jobs for the quarter and up 840 for the year.

In comparison to one year ago, private average hourly earnings increased by 4.7 percent from \$12.95 to \$13.56 per hour, although they were down 1.0 percent in the latest quarter due to a dip in retail sales earnings. Average weekly hours paid in June 2015 were 36.5, a slight decline from the 36.7 figure of one year ago. Over the year, Government of Guam average hourly earnings increased by 3.2 percent.

<sup>1</sup> Wages, Hours, and Earnings information is reported for production (nonsupervisory) workers only. Earnings are "gross", they reflect not only changes in basic hourly wage rates, but also such factors as premium pay for overtime work and shift differentials. Average weekly hours information is different from standard or scheduled hours because of such factors as absenteeism, labor turnover, part-time, overtime work, and stoppages. Due to the rounding of the Earnings and Hours Paid figures, their multiple may differ from the average weekly earnings rate shown.

<sup>2</sup> Government figures include all employees and are not directly comparable to private sector production worker estimates.

<sup>p</sup> Figures are preliminary
