# FOREWORD

Annual Federal Expenditure information for the United States with detail by State, the District of Columbia and U.S. Outlying Areas by expenditure and program category in the Consolidated Federal Funds Reports (CFFR) are available online from the U.S. Census Bureau for fiscal years 1993 – 2007.

Fiscal Year 2007 federal expenditure data is available and included for Federal Assistance awards including grants, direct and other assistance from the U.S. Census Bureau from the Federal Assistance Award Data System (FAADS). This is an important source of sometimes more current expenditure information as it is released on a quarterly basis and covers a large component of federal expenditures. In FY 2007 Federal Assistance comprised 36.5 percent of all federal expenditures and 81.5 percent of Non Defense expenditures on Guam.

Reviewing the trends in federal expenditures either in total or by category has been an onerous task as the information is published separately for each fiscal year. This report compiles the information from the fiscal years' CFFR and FAADS reports, presents it in time-series format and from that, reviews the trends in Federal Expenditures. Our reports for FY 2005 and FY 2006 federal expenditures were limited to expenditures for Guam. This year's report has been expanded in scope to include United States Insular areas in the Pacific. These other areas include CNMI, Marshall Islands, Belau and the Federal States of Micronesia. This expansion is designed to support regional employment and training as well as regional economic development efforts.

Funding for this report was provided in part by the U.S. Department of Labor, Employment and Training Administration under the Program Year 2008 Workforce Information Grant.

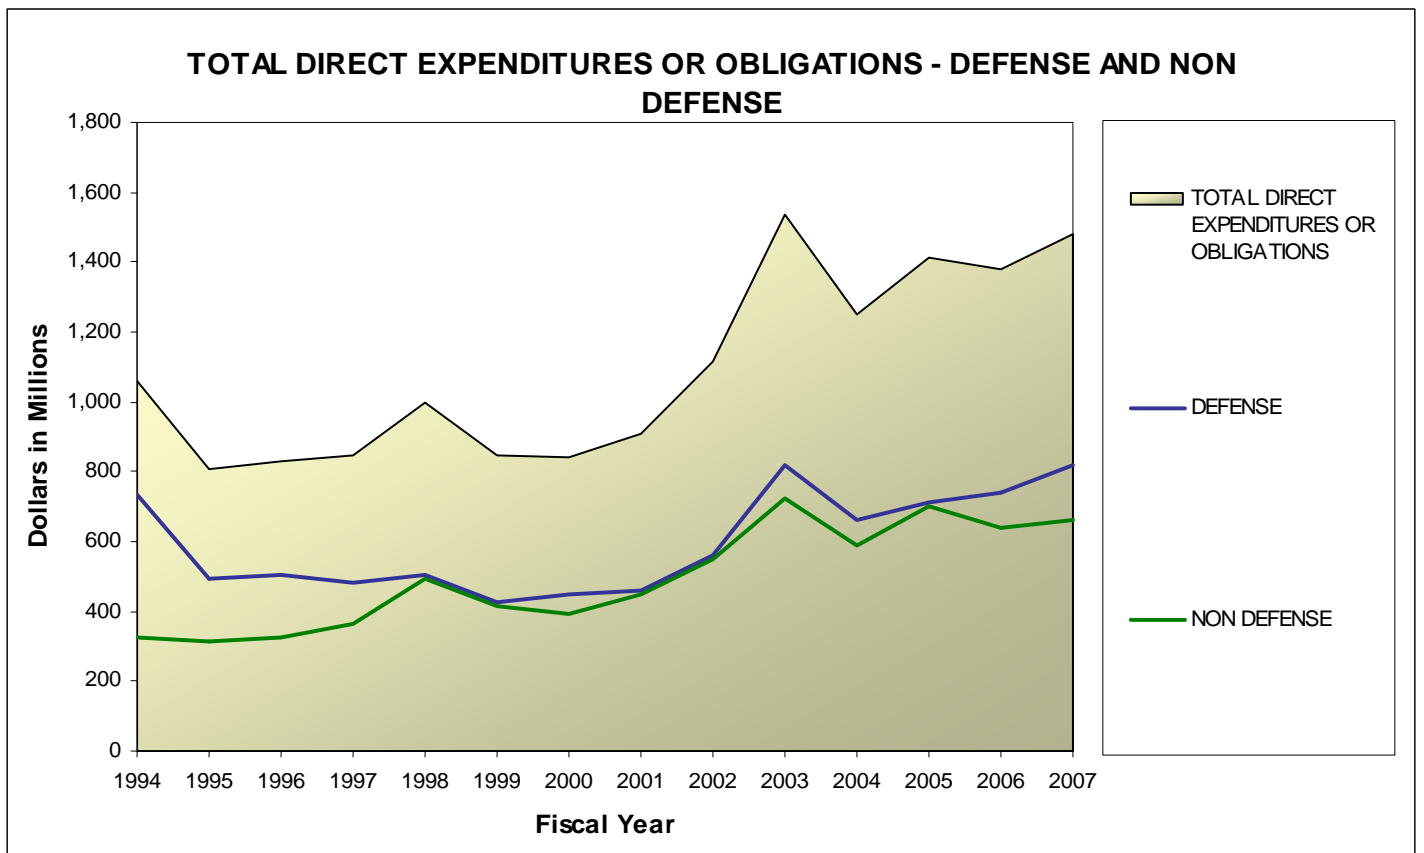

## KEY FINDINGS - GUAM

- ◆ Total federal expenditures on Guam increased 7.1% from \$1.38 billion in fiscal year 2006 to \$1.47 billion in FY 2007, the latest year for which complete information on federal expenditures is available. Federal expenditures for Defense were up 10.7% and Non Defense spending was up 3.0 percent.
- ◆ Information for federal expenditures for fiscal year 2007 from the Federal Assistance Award Data System shows a reduction (4.4%) from \$564 million in fiscal year 2006 to \$539 million in fiscal year 2007.
- ◆ Total federal expenditures on Guam have generally risen over the fourteen year history from FY 1993 to FY 2007 although the pattern has been neither smooth nor steady. The growth trend in total federal expenditures has been somewhat volatile, with three distinct peaks in expenditures related to typhoons with troughs in the intervening years. These peaks include those in 1994, 1998 and 2003 associated with typhoons Omar, Paka and Pongsona.
- ◆ Total federal expenditures on Guam increased by 39.4 percent from \$1.06 billion in FY 1994 to \$1.48 billion in FY 2007. In 1995 federal expenditure totals dropped to \$809.7 million and remained in the \$800 – \$900 million dollar level for seven years from FY 1995 – 2001. Using the lower FY 1995 level as a base, total federal expenditures on Guam increased by 74.5 percent over the decade from FY 1995 to FY 2005. Federal expenditures increased from FY 2004 to FY 2005 but remained below the highest level of federal expenditures reached in FY 2003 at over \$1.5 billion. The general trend over the five year period from FY 2000 to FY 2005 has been generally increasing with a peak due to typhoon related expenditures in FY 2003.
- ◆ Total Direct Expenditures or Obligations for Defense have increased modestly 11.3 percent, from \$734.9 million in FY 1994 to \$817.7 million in FY 2007. Total Direct Expenditures or Obligations for Non Defense activities have increased more substantially by 102.6 percent, from \$326.2 million to \$661.2 million.
- ◆ Federal spending by expenditure category in FY 2007 is led by Procurement Contracts with \$507.1 million followed by Salaries and Wages \$332.9 million, Grants \$298.6 million, Retirement / Disability Payments for Individuals \$250.4 million, Other Direct Payments for Individuals \$66.2 million and Direct Payments other than for Individuals \$23.6 million. From FY 2006 to FY 2007 Procurement contracts increased 26.4 percent while Salaries and Wages declined 4.4 percent.
- ◆ Trends in Federal spending vary markedly by expenditure category. Retirement / Disability Payments for Individuals is the most consistent, it follows a trend of steady moderate growth with minor variation. Wages and Salaries followed two different distinct trends, a fairly steady decline from FY 1993 to FY 2000 and moderate growth from FY 2000 to FY 2006. Retirement / Disability Payments and Wages and Salaries categories appear not to be influenced by the volatility in federal spending in other expenditure categories related to typhoon related assistance and recovery expenditures. Trends in other categories including Grants, Other Direct Payments for Individuals, Procurement Contracts and Direct Payments other than for Individuals show a general increasing trend with tremendous volatility related to typhoon expenditures.
- ◆ Per Capita expenditures increased 16.0 percent from \$7,413 in FY 1994 to \$8,522 in FY 2007. Increasing population numbers make the growth rate of expenditures on a per capita basis substantially lower than on a total expenditure basis as the dollars support a larger population base.
- ◆ Real Expenditures – monetary expenditures deflated by the consumer price index to account for reduced purchasing power of the expenditures due to inflation showed federal expenditures growing as a slower rate.
- ◆ Real Per Capita expenditures have shown considerable variation over the years, but have declined somewhat from 1994 - 2007 using either the U.S. or Guam C.P.I. as a deflator.

## DIRECT EXPENDITURES OR OBLIGATIONS FY 2007

## KEY FINDINGS - GUAM AND OTHER INSULAR AREAS FY 2007

- ◆ Funding by Object Code Category differs considerably by Island area. Guam's share of federal expenditures are received in Procurement Contracts 35.3%, Salaries and Wages 22.5%, Grants 20.2%, Retirement/Disability Payments for Individuals 16.9%, Other Direct Payments for Individuals 4.5% and Direct Payments other than for Individuals 1.6%.
- ◆ By Defense / Non Defense breakouts, the majority of Guam's receipts were for Defense, whereas, for all of the other areas federal expenditures for Defense were relatively very small or non-existent. The largest detailed expenditure category for Guam was Procurement Contracts—Department of Defense \$497,848,515.
- ◆ Federal receipts in the Commonwealth of the Northern Marianas Islands (CNMI) are primarily in the forms of Grants 61.2% and Retirement/Disability Payments 21.6%.
- ◆ The largest single detailed category of expenditures for the CNMI is for Economic and Political Development of the Territories and Freely Associated States \$21,655,056.
- ◆ In the Republic of the Marshall Islands (RMI) and Palau, nearly all of the federal funding is for Direct Payments other than for Individuals 97.5% and 91.1%, respectively.
- ◆ In the Federated States of Micronesia, 94.8% of the federal funding is in the form of Grants.
- ◆ The largest single detailed category of expenditure for the RMI, Palau and FSM was for Interior Department—Payments to the Territories in the amounts of \$82,623,000, \$17,740,000 and \$83,670,000.
- ◆ Federal expenditures in American Samoa are more diverse with expenditures for Grants 60.1%, Retirement/Disability Payments 23.8% and Procurement Contracts 9.3%.
- ◆ Comparing fiscal year 2007 to fiscal year 2006, federal expenditures increased on Guam by 7.1% and FSM was up 70.9, whereas, CNMI was down 26.3%, RMI down 41.3%, Palau down 15.1% and American Samoa down 13.3%. The percentage changes vary considerably by area for different historical comparison periods.
- ◆ Per Capita Non Defense expenditures in FY 2007 for these areas range from \$1,528 to \$3,810 with an average of \$2,564 for all areas combined.
- ◆ A variety of factors help explain the differences by area, some of the major factors are the level of defense activity, the level of defense procurement for construction & expansion, the number of federal employees, the number of persons receiving retirement/disability payments, the population and the participation in various federal programs and payments negotiated under compact or other agreements or settlements.

# Technical Notes

## Technical Notes

Notes: Throughout this publication, percentage figures may not exactly add to 100 due to rounding.

The following are excerpts from the Introduction section of the Consolidated Federal Funds Report for Fiscal Year 2007, issued September 2008.

The Consolidated Federal Funds Report (CFFR) is a presentation of data on federal government expenditures or obligations in state, county, and subcounty areas of the United States, including the District of Columbia and U.S. Outlying Areas. CFFR contains statistics on the geographic distribution of federal program expenditures, using data submitted by federal departments and agencies. These data have been consolidated and tabulated in a standard format by the U.S. Census Bureau under the auspices of the U.S. Office of Management and Budget.

### REPORT COVERAGE

The Consolidated Federal Funds Report (CFFR) covers federal government expenditures or obligations for the object categories listed below. For fiscal year 2007, amounts reported totaled \$2.6 trillion for the direct expenditure or obligation categories, and \$1.4 trillion for other federal assistance (loans and insurance programs):

- Retirement and disability (\$783 billion)
- Other direct payments (\$585 billion)
- Grants (\$496 billion)
- Procurement contracts (\$440 billion)
- Salaries and wages (\$253 billion)
- Direct loans (\$22 billion)
- Guaranteed or insured loans (\$173 billion)

- Insurance (\$1.2 trillion)

Dollar amounts reported under these categories can represent either actual expenditures or obligations. As a general guide, the grants and procurement data in this report represent obligated funds, while direct payments and salaries and wages represent actual expenditures (outlays). Data on loan and insurance programs generally represent the contingent liability of the federal government.

Certain categories of federal government spending are intentionally excluded from this report. These include such items as interest paid on federal government debt, travel expenses when not provided under procurement contract, and international payments and foreign aid.

The financial activity of all federal government agencies is covered, with exceptions for those agencies that do not submit data to any of the federal statistical reporting systems that serve as sources of information for the CFFR.

Conceptual or functional exclusions and the agencies not covered in CFFR are discussed below, under the heading "Amounts Excluded From CFFR Coverage."

### SUMMARY OF METHODOLOGY

This is a consolidated report, developed by bringing together available statistics on federal government expenditures or obligations. The first phase of the CFFR program is to identify the available data sources. The following reporting systems and agencies are used as primary data sources:

- U.S. Department of Defense
- Federal Assistance Award Data System
- Federal Procurement Data System
- Office of Personnel Management
- U.S. Postal Service

In addition to these primary sources, several other federal agencies are requested to provide data, usually for selected programs. Most of these are agencies that do not report under the requirements of the Federal Assistance Award Data System (FAADS).

Finally, selected data are from the information on payments to state or local governments reported by federal agencies for the U.S. Census Bureau's Federal Aid to States (FAS) survey. These data cover federal government grants that are not required to be reported in the FAADS, such as the federal government annual payment to the District of Columbia.

### RELATIONSHIP TO FEDERAL ASSISTANCE AWARD DATA SYSTEM (FAADS)

The Federal Assistance Award Data System (FAADS) is a quarterly report of financial assistance awards made by each federal agency. Coverage includes most (but not all) grants, direct payments to individuals and others, insurance, and loans. Data submitted by federal agencies for the FAADS serve as the source for most of the statistics in this publication. The FAADS does not provide information on either salaries and wages or procurement contracts. All

## Technical Notes

CFFR data not obtained through the FAADS are otherwise obtained from federal agencies.

The Office of Management and Budget selected the Census Bureau as executive agent, responsible for operating the FAADS. Data on financial assistance awards are submitted quarterly by federal government agencies. The Census Bureau collects these data and combines them to form a single quarterly compilation of federal government financial assistance awards. Each quarterly data set is distributed to the Congress and to state governments. In addition to grant awards, the FAADS program covers direct payments to individuals (such as retirement benefits), direct payments for specified use (such as food stamp awards), cooperative agreements, guaranteed loans, direct loans, and insurance programs of the federal government.

All financial assistance awards in the FAADS are identified by a Catalog of Federal Domestic Assistance (CFDA) program number (or a pseudo code, if a CFDA number is unavailable).

For grants, the FAADS data represent the federal obligation incurred at the time the grant award transaction is obligated. The amounts reported do not represent actual expenditures, since obligations in one time period may not result in outlays during the same time period. Moreover, initial amounts obligated may be adjusted at a later date, either through enhancements or deobligations.

These deobligations may appear in the CFFR data as negative amounts. Users should be aware of what these amounts represent and use care in interpreting such data.

For fiscal year 2007, CFFR derived data from the FAADS by summing the four quarterly reports that covered financial assistance awarded between October 1, 2006, and September 30, 2007. All program awards in FAADS are reported by state, county, and usually, city of recipient. Submitting agencies use either FIPS-55 geographic codes for states, counties, and places, or General Services Administration worldwide location codes.

### RELATIONSHIP TO FEDERAL AID TO STATES (FAS)

The publication, *Federal Aid to States for Fiscal Year 2007* (FAS), presents state-by-state distributions of federal government expenditures for grants to state and local governments only. In the CFFR, federal grants generally represent obligations (not expenditures or outlays), and include grants to nongovernmental recipients, in addition to payments to state and local governments.

The *Federal Aid to States* report generally covers actual federal grant outlays to state and local governments, by agency and program. Data reported in the FAS are submitted to the Census Bureau in accordance with OMB Circular A-11 and the Census Bureau's annual *Federal Aid to States* reporting guidelines.

To the extent possible, the data on grants to state and local governments in FAS are reconciled with amounts in the federal budget. The definitions applied in the budget for grants to governments serves as the basis for reporting in the FAS publication.

### DESCRIPTIONS AND DATA SOURCES

The descriptions that follow include explanations of the coverage, conceptual basis for reporting (expenditures versus obligations), geographic basis for reporting, and other information important for interpreting the data in the CFFR. The use of the term FIPS geographic codes in the following text refers to the Federal Information Processing Standards codes maintained by the National Institute of Standards and Technology, U. S. Department of Commerce.

#### Total Expenditure

All amounts are aggregates. Data are rounded to millions of dollars. Total expenditure does not include data on contingent liabilities (loans and insurance), which are separately listed.

#### Retirement and Disability

In the CFFR, data covering federal government direct payments are separated into two object categories: direct payments for retirement and disability benefits, and all other direct payments. Retirement and disability programs include federal employee retirement and disability benefits, social security payments of all types, selected Veterans Administration programs, and selected other federal programs.

#### Consolidated Federal Funds Report for Fiscal Year 2007

Both the FAADS and the Catalog of Federal Domestic Assistance (CFDA) categorize direct payments in a different manner from the CFFR. Both the FAADS and the CFDA subdivide direct payments into the two subcategories, "Direct Payments for a Specified Use" and "Direct Payments with Unrestricted Use." Neither subdivision is recognized in the CFFR. The CFFR instead subdivides direct payments into three object types: object code DR for "Retirement and Disability Payments to Individuals," object code DO for "Other Direct Payments for Individuals," and object code DX for "Direct Payments Other than for Individuals." Only object code DR is presented. Object codes DO and DX are also presented.

The CFDA defines "Direct Payments for a Specified Use" as "Financial assistance provided directly to individuals, private firms, and other private institutions to encourage or subsidize a particular activity by conditioning the receipt of assistance on a particular performance by the recipient. This does not include solicited contracts for the procurement of goods and services for the federal government." The FAADS similarly defines "Direct Payments for a Specified Use" as "a subsidy or other nonreimbursable direct financial aid."

The CFDA defines "Direct Payments With Unrestricted Use" as "Financial assistance provided directly to beneficiaries who satisfy eligibility requirements with no restrictions imposed on the recipient as to how the money is spent. Included are payments under retirement, pension, and compensation programs." The FAADS defines "Direct Payments With Unrestricted Use" with such examples as "retirement, pension, veterans benefits, etc."

Except Retirement and Disability, are compiled from amounts reported by the Federal Agencies for the Federal

## Technical Notes

Assistance Award Data System (FAADS). Reported amounts represent obligations of federal funds during the fiscal year. Direct payments for individuals are shown by state and county area only, in accordance with the reporting requirements of the FAADS.

### Other Direct Payments

Programs classified as other direct payments include two CFFR object categories. The first object category (code "DO") is direct payments for individuals, other than for retirement and disability. The second object category (code "DX") is direct payments, other than for individuals. The first object category contains far more expenditure than the second object category. For convenience of presentation, these two object categories are combined in the CFFR publication, but are available separately in the CFFR database.

Amounts shown in Other Direct Payments, come from the FAADS, except for those programs listed below. These amounts generally represent obligations incurred during the fiscal year. The four quarterly FAADS data sets are consolidated to obtain fiscal year totals. Direct payments for individuals are reported by state and county area only.

Excess earned income tax credits represent federal government payments during calendar year 2007 for tax year 2006. Information is from the Department of the Treasury, Internal Revenue Service, Statistics of Income Division. Amounts reflect only the excess earned income tax credits actually refunded. Aggregate figures by state are reported. No substate detail is available.

Crop Insurance data on the amount of indemnity payment (claims) and premium subsidies are provided by the U.S. Department of Agriculture. Coverage includes the claims paid directly by the federal government to farmers, and premium subsidies to private insurers. Federal indemnity payments to private insurance carriers are not reported. Amounts reflect the resident county of the claimant for direct payment, or location of county of the private carrier for premium subsidies. Data reflect actual expenditures during fiscal year 2007.

FEMA provides county level data for payments under the National Flood Insurance program. Amounts represent claims and adjustor expenses.

Legal Services Corporation expenditures data are from that agency. The Legal Services Corporation payments represent annualized grants and contracts, by state, made by this agency from the subsidy it receives from the federal government. U.S. Postal Service expenditures for current operations, other than procurement and salaries and wages, are provided by the Postal Service as part of that agency's total submission for CFFR. Data are provided by state and county area, with the distribution based on the methodology described later for Postal Service salaries and wages.

Data for the federal government (employer) share of premiums on federal employee life and health insurance are from OPM, Center for Retirement and Insurance Services.

All expenditures for life and health insurance premiums are assigned to the "state undistributed" level of geography. For

both the life and health insurance programs, the amounts reported represent only the employer (federal government) share of the premiums.

The U.S. Department of Education reports fiscal year 2007 payments under the Federal Family Education Loan program. Amounts under the other direct payments for individuals category include interest subsidies. Amounts under the direct payments, other than for individuals, category include default payments, advances, and administrative cost allowances for guarantee agencies.

Food Stamp program data are supplied by the Department of Agriculture for the FAADS. Amounts reflect the actual value of benefits awarded, by state, during the fiscal year. Figures may differ slightly from amounts representing the value of benefits redeemed or processed through the Federal Reserve System.

Statistics on federal expenditures for unemployment compensation are compiled from information obtained from the Department of Labor. Amounts reported include all benefit payments made from the Unemployment Compensation Trust Fund, regardless of the source of funding for the payments. Thus, amounts reported include regular and extended benefits to unemployed workers, and benefits to ex-civilian and ex-military federal employees.

Prior to 1989, only benefit payments financed by the federal government were included in this publication.

The Office of Justice Programs provides data for payments under the Public Safety Officers' Benefit Program (CFDA 16.571) of the U.S. Department of Justice.

Medicare data are reported by the U.S. Department of Health and Human Services for the FAADS. All amounts reflect obligations during the fiscal year, with the state-by-state distribution estimated. All amounts are reported by recipient location. Excluded from the amounts reported are payments to recipients in foreign countries.

### Grants

The grants category in the CFFR combines two grants categories listed in the CFDA and four grants categories found in the FAADS. The CFDA distinguishes two categories of grants: Formula Grants and Project Grants. The FAADS subdivides Formula Grants into two further categories: Block Grant and Formula Grant. The FAADS also subdivides Project Grants into two further categories: Project Grant and Cooperative Agreement.

The CFDA defines "Formula Grants" as "Allocations of money to states or their subdivisions in accordance with a distribution formula prescribed by law or administrative regulation, for activities of a continuing nature not confined to a specific program." The CFDA defines "Project Grants" as "The funding, for fixed or known periods, of specific projects or the delivery of specific services or products without liability for damages for failure to perform. Project grants include fellowships, scholarships, research grants, training grants, traineeships, experimental and demonstration grants, evaluation grants, planning grants, technical assistance grants, survey grants, construction grants, and unsolicited contractual agreements." No further

## Technical Notes

definitions are provided in the FAADS or FAS.

The principal source of the grants data in the CFFR is the information submitted quarterly for the FAADS. For grants, the FAADS data represent the federal obligation incurred at the time the grant is awarded. The grants data from FAADS that are carried forward to the CFFR total about 98 percent of all grants reported. (See section above, "Relationship to Federal Assistance Award Data System (FAADS)" for further information about FAADS.)

The remaining grants data for the CFFR are from data submitted to the Census Bureau pursuant to the annual Federal Aid to States (FAS) survey, and OMB Circular A-11. These submissions are required annually of all federal government agencies that make payments to state or local governments. Selected grant programs data are obtained from the Federal Aid to States (FAS) data base to ensure comprehensive coverage in the CFFR. FAS data are available only at the state area level of reporting. (See section above, "Relationship to Federal Aid to States (FAS)" for further information about FAS.)

### Procurement

Statistics covering federal government procurement contracts, are provided by the U.S. Postal Service (USPS) for Postal Service procurement and by the Federal Procurement Data Center (FPDC) within the General Services Administration for procurement actions of nearly all other federal agencies, including the U.S. Department of Defense. Data on the procurement contracts of the Federal Aviation Administration (FAA) are obtained directly from that agency.

Amounts provided by the USPS represent actual outlays for contractual commitments, while amounts provided by the FPDC represent the value of obligations for contract actions, and do not reflect actual federal government expenditures. In general, only current year contract actions are reported for data provided by the FPDC; however, multiple-year obligations may be reflected for contract actions of less than 3 years' duration.

The FPDC collects procurement statistics on a quarterly basis from most federal government departments and agencies, and provides these data according to the place of performance rather than the location of the prime contractor. Excluded from the procurement totals reported are the amounts for the judicial and legislative branches of government and most intergovernmental transfers of funds. Also excluded from the totals are amounts for procurement in foreign countries. Also, certain Department of Defense contracts are classified with respect to location of performance. Such amounts are reported as "U.S. undistributed."

Procurement data awarded by the USPS include all outlays made under formal contractual agreements. The FPDC data include contractual actions for construction, purchases of equipment, and other purchases of tangible items by the federal government. Also included with the FPDC data are contractual actions for services often not generally associated with procurement, such as the purchase of utilities, building leases, and other services entered into via contractual agreement.

Procurement data provided by the FPDC are distributed according to place of performance, as designated by FIPS state county/place geographic coding. These geographic codes are matched against the government unit codes comprising the geographic basis for the CFFR, and assigned to any units where a match is found. Unmatched data records are distributed to "balance of county" represented by the state/county portion of the FIPS geographic code. (For those FPDC data records submitted only with a state/place code, a county code is first assigned via a geographic conversion file.)

Government "purchase card" data have also been included this year, and prior year data back to fiscal year 1993 have been revised to include this item. In order to improve data accuracy and avoid duplicate counting, FPDC has instituted new reporting features that specifically identify purchase card transactions as either small "micro-purchases" or traditional contract payments that utilize the purchase card.

### Salaries and Wages

Amounts reported for federal government salaries and wages are from five sources: the Department of Defense, the Postal Service, the Federal Bureau of Investigation, the U.S. Coast Guard (previously within the U.S. Department of Transportation and now a part of the U.S. Department of Homeland Security), and the Office of Personnel Management. All amounts represent outlays during the federal government's fiscal year.

The Defense Department provides information on military payrolls, with separate amounts for active military and inactive military (Reserve and National Guard). These data are from the Directorate for Information Operations and Reports of the Washington Headquarters Services, Department of Defense. (Note that salaries and wages data covering civilian employees of the Defense Department are from the Office of Personnel Management, as described below.) The submission from the Defense Department is an electronic file containing data records that are distributed using FIPS geographic codes for states and counties.

Amounts reported represent estimates of fiscal year outlays by state and county and include gross compensation. This covers salaries and wages, housing allowances, and, in general, all other personnel compensation, except retired military pay, which is reported under the separate category, retirement and disability direct payments for individuals. Other features of the Department of Defense salaries and wages include:

1. Amounts for military personnel stationed overseas are excluded from totals.
2. Salaries and wages for inactive personnel refer to military Reserve and National Guard payroll.
3. Amounts reported reflect the place of employment (duty station) rather than home residence.

Salaries and wages data for U.S. Postal Service employees are provided by the U.S. Postal Service. Amounts represent actual outlays during the fiscal year, but with the national total distributed among the states and counties on an estimated basis. Estimates are derived by calculating the

## Technical Notes

“per employee” payroll cost and applying this cost to each postal facility based upon the number of employees. The Postal Service data are geographically distributed based upon place of employment (postal facility), rather than place of residence. Statistics on salaries and wages for uniformed employees of the U.S. Coast Guard are reported by the U.S. Coast Guard, now a unit of the Department of Homeland Security. Data are reported by ZIP Code, for the place of employment. Amounts are then aggregated by county area.

Salaries and wages for all other federal employees are from the Office of Personnel Management. Coverage includes all other federal civilian employees (excluding the Central Intelligence Agency, Defense Intelligence Agency, and the National Security Agency) employed in the United States and the outlying areas. Data are reported separately for each major federal agency. The data include:

- Basic annual salaries
- Premium pay (overtime, night differential, cost of living allowances, station allowances, holiday pay, and any retroactive pay, but excludes lump sum pay for annual leave)
- Lump sum payments (for annual leave)

OPM national totals represent actual expenditures or outlays during the fiscal year. The geographic distribution of these amounts by state (or outlying area) and county are estimated, based upon place of employment.

### Direct Loans, Guaranteed Loans, and Insurance

The CFDA defines “Direct Loans” as “Financial assistance provided through the lending of federal monies for a specific period of time, with a reasonable expectation of repayment. Such loans may or may not require the payment of interest.” The CFDA defines “Guaranteed/Insured Loans” as “Programs in which the federal government makes an arrangement to indemnify a lender against part or all of any defaults by those responsible for the repayment of loans.” The CFDA defines “Insurance” as “Financial assistance provided to assure reimbursement for losses sustained under specified conditions. Coverage may be provided directly by the federal government or through private carriers and may or may not involve the payment of premiums.” The FAADS and CFFR use the same categories and provide no separate definitions.

All data on loans and insurance programs of the federal government, with the exception of data on flood insurance and student loan programs, come from the FAADS. Guaranteed loans, direct loans, and insurance are reported in the FAADS by state and county area, or by state, county, and place. Data on the Federal Family Education Loan program (CFDA number 84.032) are not reported for the Federal Assistance Award Data System, and are obtained separately from the Department of Education. National Flood Insurance data (CFDA number 97.022), reflecting insurance in force on September 30, 2007, are from FEMA, Department of Homeland Security.

Loan and insurance program amounts reflect the volume of

loan or insurance activities. These amounts represent either direct loans made to certain categories of borrowers, or the federal government contingent liability for loans guaranteed and direct insurance against loss.

Loans and insurance data do not represent actual expenditures associated with the loan or insurance programs. Any actual outlays under these programs, such as insurance claims paid by the federal government, appear in the direct payments categories in the CFFR. Federal government contingent liability can vary by program, and caution should be used in comparing one federal loan or insurance program to another, or in interpreting the data presented to reflect actual federal outlays over time. The following also should be noted:

1. Amounts guaranteed or insured do not necessarily represent future outlays.
2. All amounts reflect the dollar value of loans or insurance coverage provided during the fiscal year, and not the cumulative totals of such activity over the life of the program.
3. Direct loans are not reported on a net basis, as in the federal budget, but rather are shown in terms of total amounts loaned.
4. Programs otherwise similar can vary in the share of the total liability that the federal government guarantees or insures. Certain veterans guaranteed loan programs are guaranteed only up to a stated maximum dollar value, for example. In these cases, the federal government contingent liability is less than the total value of the loan or insured policy agreement.

### Miscellaneous Calculations

Per capita federal expenditure amounts are computed using resident population as of July 1, 2007.

### Defense Department and All Other Agencies

The Defense Department and other agency expenditure amounts are computed from data in Retirement and Disability, Other Direct Payments, Grants, Procurement, and Salaries and Wages. Figures for all Department of Defense agencies are tallied to arrive at a total for Department of Defense expenditures. This total is then netted from the grand total of federal government expenditures, and the residual categorized as nondefense expenditures. This procedure is followed for each state and outlying area. The defense/nondefense totals are then used to compute per capita and percent distribution amounts, using the procedure described above.

Data in the column on U.S. Department of Energy defense related activities are included in the columns for “All other federal agencies,” rather than Department of Defense.
