<sup>1</sup>The incidence rates represent the number of injuries and illnesses per 100 full-time equivalent workers and were calculated as: (N/EH) x 200,000, where

N = number of injuries and illnesses

EH = total hours worked by all employees during the calendar year

200,000 = base for 100 full-time equivalent workers (working 40 hours per week, 50 weeks per year)

<sup>2</sup>Totals include data for industries not shown separately.

<sup>3</sup>North American Industry Classification System -- United States, 2017

<sup>4</sup>Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>5</sup>Excludes farms with fewer than 11 employees.

<sup>6</sup>Relative standard errors were not calculated for rail transportation (NAICS 482) or for mining, except oil and gas (NAICS 212).

<sup>7</sup>Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation.

<sup>8</sup>Less than 15 cases

NOTE: Because of rounding, components may not add to totals. Dash indicates data do not meet publication guidelines.
