¹The incidence rates represent the number of injuries and illnesses per 100 full-time equivalent workers and were calculated as:

(N/EH) x 200,000, where

N = number of injuries and illnesses

EH = total hours worked by all employees during the calendar year

200,000 = base for 100 full-time equivalent workers (working 40 hours per week, 50 weeks per year)

²Totals include data for industries not shown separately.

³North American Industry Classification System -- United States, 2017

⁴Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

⁵Excludes farms with fewer than 11 employees.

⁶Less than 15 cases

⁷Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation.

NOTE: Because of rounding, components may not add to totals. Dash indicates data do not meet publication guidelines.
