

### EXPLANATORY NOTE

Estimates in this release are based on the Current Employment Statistics (CES) survey conducted quarterly by the Guam Department of Labor's Bureau of Labor Statistics in cooperation with the U.S. Department of Labor's Employment and Training Administration.

## Employment Concepts

Employment data, except those for the Federal Government, refer to persons on establishment payrolls who received pay for any part of the pay period, which includes the 12<sup>th</sup> of the month. For Federal Government establishments, employment figures represent the number of persons who occupied positions on the last day of the calendar month. Intermittent workers are counted if they performed any service during the month.

The data excludes proprietors, the self-employed, unpaid volunteer or family workers and domestic workers in households. Salaried officers of corporations are included. Government employment covers only civilian employees; military personnel are excluded.

Persons on establishment payrolls who are on sick leave (when pay is received directly from the firm), on paid holiday or paid vacation, or who work during a part of the pay period and are unemployed or on strike during the rest of the period are counted as employed. The CES survey counts a person employed by two or more establishments at each place of employment. Not counted as employed are persons who are laid off, on leave without pay, or on strike for the entire period or who are hired but have not been paid during the period.

## Industrial Classification

Establishments reporting on Form BLS-CES 3 are classified into industries on the basis of their principal product or activity determined from information on annual sales volume. This information is collected on a supplement to the quarterly shuttle questionnaire. For an establishment making more than one product or engaged in more than one activity, the entire employment is included under the industry indicated by the most important product or activity. Employment series are classified in accordance with the Standard Industrial Classification Manual, U.S. Office of Management and Budget. The 1972 Classification was used for the CES until March 1989 when a change to the 1987 edition was made.

## Acknowledgements

Acknowledgement is due the University of Guam Computer Center programmer Ms. Frances Villaverde for data processing and programming work. Acknowledgement is also due Marie Heflin of the Department of Labor for conducting the survey.

## Employment Highlights

The June 2025 preliminary statistics show a decrease of 470 jobs over the year and a decline of 360 in the latest quarter.

The greatest private sector employment reductions over the year were in Construction 900, the majority of which were H-2 workers.

In the latest quarter Construction industry employment declined by 210. The average weekly hours paid for the industry declined from 43.3 to 40.6. Average weekly earnings increased from \$794.36 to \$816.48 due to an increase in the average hourly earnings from \$19.25 to \$20.12.

Hotel employment numbers which had been increasing remained relatively unchanged in the recent quarter and year. The Hotel industry's average hourly earnings, average weekly hours paid and average weekly earnings declined slightly over the latest quarter and year.

In comparison to the previous year in June 2024, private nonsupervisory average hourly earnings for all industries increased from \$18.31 to \$18.72, average weekly hours paid decreased from 38.9 to 37.6 and average weekly earnings decreased from \$712.97 to \$703.50.

In June this year, the Department of Youth Affairs summer youth employment program commenced earlier so that the temporary employees under this program earning \$10.00 per hour were included in this June's payroll figures. This increased the number of Government of Guam employees which would have otherwise declined and also reduced average hours worked and weekly earnings.

<sup>1</sup> Wages, Hours, and Earnings information is reported for production (nonsupervisory) workers only. Earnings are "gross", they reflect not only changes in basic hourly wage rates, but also such factors as premium pay for overtime work and shift differentials. Average weekly hours information is different from standard or scheduled hours because of such factors as absenteeism, labor turnover, part-time, overtime work, and stoppages. Due to the rounding of the Earnings and Hours Paid figures, their multiple may differ from the average weekly earnings rate shown.

<sup>2</sup> Government figures include all employees and are not directly comparable to private sector production worker estimates.

<sup>3</sup> Government of Guam June 2025 figures include DYA Summer Employment and Training Programs for Youth.

<sup>p</sup> Figures are preliminary
